

The Primal Screen: A History of Science Fiction Film

This history of science fiction film traces the genre from its earliest days to the two pre-war blockbusters, *Metropolis* and *Things to Come*, whose commercial failure put an end to big-budget science fiction film-making for 30 years. It goes on to examine the space adventures of the 1950s, such as *Forbidden Planet* and *This Island Earth*, the more horror-based examples such as *Invasion of the Body-Snatchers*, the hugely successful 2001 and the post-*Star Wars* boom from the late 1970s onwards. The author is a science fiction critic and author whose novels include the *Skylords* series.

No stencils or patterns are ever used. Every birdhouse is treated with several coats of high quality exterior varnish for protection from the elements and to ensure colors will stay bright throughout the seasons. Birds love gourds for nesting and will often return to the same one year after year. When nesting season ends, the gourd's usefulness doesn't end. Birds will continue to use them as shelter from weather and for protection from predators.
