

# Introduction to Environmental Management

It is hard to imagine an area of study or a discipline in which a basic knowledge of the issues would not be beneficial, since environmental concerns are very much in the public consciousness. Written at a level that is accessible to students in all disciplines, *Introduction to Environmental Management* translates complex environmental issues into understandable terms. This book gives students and practitioners an understanding of regulations, pollutants, and waste management that they can take into whatever field or business they pursue. Sections include: Overview introduces environmental issues, regulations, and types of pollutants; Air covers issues related to air pollution, including how air pollution can be controlled and the quality of indoor air; Water discusses the problems of pollution in water and methods to control it; Solid Waste examines the different types of solid waste, such as hazardous, medical, and nuclear, as well as treatment techniques for each; Pollution Prevention focuses on pollution prevention in areas such as health, safety, and accident prevention; energy conservation; and waste reduction; Risk examines how environmental risks are perceived and communicated, and how individuals can be educated about them; Other Areas of Interest includes coverage of electromagnetic fields, environmental implications of nanotechnology, and ethical issues as they relate to the environment. A complete teaching tool, this book offers a combination of insightful coverage, concise language, and convenient pedagogical features.

No stencils or patterns are ever used. Every birdhouse is treated with several coats of high quality exterior varnish

for protection from the elements and to ensure colors will stay bright throughout the seasons. Birds love gourds for nesting and will often return to the same one year after year. When nesting season ends, the gourd's usefulness doesn't end. Birds will continue to use them as shelter from weather and for protection from predators. If you don't see what you want, please contact me for a custom made gourd creation or inquire about other types of artwork...anything from pet portraits to painted milkcans! Enjoy your visit!
