

Horror Screenwriting: The Nature of Fear

Horror has, among all of the genres in film and written works, one of the longest, most distinguished, and often misunderstood bloodlines in history. It is often overlooked by critics who don't see anything more than blood and guts on the screen, or a collection of cheap scares. But what is missed is the hard-hitting commentary on society and life contained in those works.

No stencils or patterns are ever used. Every birdhouse is treated with several coats of high quality exterior varnish for protection from the elements and to ensure colors will stay bright throughout the seasons. Birds love gourds for nesting and will often return to the same one year after year. When nesting season ends, the gourd's usefulness doesn't end. Birds will continue to use them as shelter from weather and for protection from predators.
