

The Internet Law of India: Indian Law Series

This book is BARE ACT of Indian Law on internet and cyber act or cyber rules within Indian territories. It is the hardcore set of rules as exactly provided by Indian government authorities. Internet censorship in India is selectively practiced by both federal and state governments. While there is no sustained government policy or strategy to block access to Internet content on a large scale, measures for removing content have become more common in recent years. However, websites blocked either by the government or Internet service providers can often be accessed through proxy servers (see Internet censorship circumvention). The Information Technology Act, 2000 (also known as ITA-2000, or the IT Act) is an Act of the Indian Parliament (No 21 of 2000) notified on 17 October 2000. It is the primary law in India dealing with cybercrime and electronic commerce. It is based on the United Nations Model Law on Electronic Commerce 1996. An Act to provide legal recognition for transactions carried out by means of electronic data interchange and other means of electronic communication, commonly referred to as electronic commerce, which involve the use of alternatives to paper-based methods of communication and storage of information, to facilitate electronic filing of documents with the Government agencies and further to amend the Indian Penal Code, the Indian Evidence Act, 1872, the Bankers Books Evidence Act, 1891 and the Reserve Bank of India Act, 1934 and for matters connected therewith or incidental thereto. The original Act contained 94 sections, divided in 19 chapters and 4 schedules. The laws apply to the whole of India. Persons of other nationalities can also be indicted under the law, if the crime involves a computer or network located in India. The Act provides legal framework for electronic governance by giving recognition to electronic records and digital

signatures. The formation of Controller of Certifying Authorities was directed by the Act, to regulation issuing of digital signatures. It also defined cyber crimes and prescribed penalties for them. It also established a Cyber Appellate Tribunal to resolve disputes rising from this new law. The Act also amended various sections of Indian Penal Code, 1860, Indian Evidence Act, 1872, Bankers Book Evidence Act, 1891, and Reserve Bank of India Act, 1934 to make them compliant with new technologies.
