# Move to Fire: A familys tragedy, a lone attorney, and a teenagers victory over a corrupt gunmaker

Every American should read this book before the upcoming election, because it provides a foundation for understanding what's really at stake in our national gun debate. As the story unfolds, it reveals the previously unknown, systemic extent of the gun industry's complete immunity from all safety and production oversight and, by its own obstinacy and inaction, its ethical culpability in every gun-related tragedy, whether it's an accidental shooting of a little boy or the slaughter of innocents by an assault rifle. A decade after seven-year-old Brandon Maxfield was paralyzed by a defective gun, he and his attorney accomplished what the government, firearms industry, and gun safety groups failed to do - hold the defective gun manufacturer accountable for creating millions of low quality, dangerous guns so connected to tragedy that they were known as junk guns, crime guns, and Saturday Night Specials. When the gunmaker filed bankruptcy to avoid paying his half of a \$50,000,000 product liability award to Brandon, then schemed to resurrect the company, the teen launched a campaign to acquire the company himself and stop it from producing thousands more defective guns. Brandon's and attorney Richard Ruggieris efforts attracted national support, and derision, as their story became international news. Michael W. Harkins' compelling narrative is an illuminating account of the people and events that captivated the world's leading media outlets in nine countries, and also reveals why millions of defectively designed guns like the one that almost killed Brandon Maxfield are still on the streets.
