

Company Law in China: Regulation of Business Organizations in a Socialist Market Economy

This accessible book offers a comprehensive and critical introduction to the law on business organizations in the Peoples Republic of China. The coverage focuses on the 2005-adopted PRC Company Law and the most recent legislative and regulatory developments in the company law landscape in China. The book covers a wide range of topics including the definitions of companies as compared with other forms of business organizations, incorporation, shareholders rights and legal remedies, corporate governance (including the fiduciary and other duties and liabilities of directors, supervisors and managers), corporate finance (including capital and shares offering), fundamental corporate changes (including mergers & acquisitions, and takeovers), and corporate liquidation and bankruptcy. In addition to presenting strong doctrinal analysis, the author also considers Chinas unique social, political and economic contexts.
