

Environment and Law (Routledge Introductions to Environment: Environment and Society Texts)

This textbook provides a concise introduction for students with little or no legal background, to the role of law in environmental protection. It describes and explains law and legal systems, the concept of the environment, sources of environmental law and some of the techniques used in environmental law. Interdisciplinary in approach, the book explores some of the major connections between law and the disciplines of ethics, science, economics and politics. Environment and Law offers a greater understanding of international and national environmental law and has case-studies from all over the world, including examples from UK, US and Australian law.

No stencils or patterns are ever used. Every birdhouse is treated with several coats of high quality exterior varnish for protection from the elements and to ensure colors will stay bright throughout the seasons. Birds love gourds for nesting and will often return to the same one year after year. When nesting season ends, the gourd's usefulness doesn't end. Birds will continue to use them as shelter from weather and for protection from predators.
