

Reframing Scopes: Journalists, Scientists, and Lost Photographs from the Trial of the Century

The plight of John T. Scopes dominated headlines for weeks, but behind the scenes of the famous Monkey Trial were other dramas hidden from public view. Now a serendipitous discovery has opened a new window on the Trial of the Century, enabling modern readers to comprehend more completely the tensions that gripped a Tennessee community and the nation in 1925. Historian Marcel LaFollette was combing through unprocessed records at the Smithsonian when she found a cache of more than sixty never-before-published photographs taken at the Scopes trial. Her research on these photos sheds new light on the proceedings, as well as on the journalists and scientists who gathered for this epic confrontation between science and tradition. Deftly integrating text and illustrations, LaFollette takes readers behind the scenes to witness the trial from the perspective of science writers Watson Davis and Frank Thone, who had come to cover the trial but became informal liaisons between defense attorneys and the scientific community. The two journalist-photographers observed visitors and events and even befriended John Scopes in the years following the trial. Their impressions offer new views of Clarence Darrow and William Jennings Bryan and reveal the role of fascinating characters like George Washington Rappleyea, the cocky promoter who saw the trial as a way to bring publicity, tourists, and new business to Dayton. These photo-trial witnesses and visiting celebrities, an outdoor baptism service, defiant ministers assembled in front of a Dayton church help ground the Scopes trial in southern religion and culture and relate it to a time and place on the cusp of change. The notes of Davis and Thone preserve keen observations of personalities and events, while letters between Scopes and the two reporters in the years after the trial help illuminate the character of an

ordinary young man thrust into extraordinary circumstances. LaFollette weaves an engaging story of friendship, newly minted coalitions between scientists and journalists, and acts of goodwill in the midst of turmoil. The Scopes trial remains the consummate metaphor for cultural combat between science and religion. Reframing Scopes enables us to understand better the passions that swept one small town and came to divide the nation.

New Products - more Information Shipping & Returns Privacy Notice Conditions of Use Contact Us Site Map Gift Certificate FAQ Discount Coupons Newsletter Unsubscribe All my gourd creations are original, handcrafted, signed and dated. No stencils or patterns are ever used. Every birdhouse is treated with several coats of high quality exterior varnish for protection from the elements and to ensure colors will stay bright throughout the seasons. Birds love gourds for nesting and will often return to the same one year after year. When nesting season ends, the gourd's usefulness doesn't end. Birds will continue to use them as shelter from weather and for protection from predators. If you don't see what you want, please contact me for a custom made gourd creation or inquire about other types of artwork...anything from pet portraits to painted milkcans! Enjoy your visit!
