

Visconti: Insights into Flesh and Blood

Something needs to be changed be it through the revolutionary overthrow of social conditions, the liberating force of passion, the contemplation and creation of works of art, or the exploration of an unresolved past. Luchino Visconti's films are models for the failure of such attempts. They show that this failure arises whenever people cling to possibilities that stand opposed to the reality of their lives. Does Adorno not write: The place of utopia is blocked off by possibility, never by immediate reality? *Visconti: Insights into Flesh and Blood* draws on aesthetics, film theory, and practical philosophy to propose an original interpretation of the melodramas of a great European director. In the encounter with Visconti's art, we come to see that something has changed already.

No stencils or patterns are ever used. Every birdhouse is treated with several coats of high quality exterior varnish for protection from the elements and to ensure colors will stay bright throughout the seasons. Birds love gourds for nesting and will often return to the same one year after year. When nesting season ends, the gourd's usefulness doesn't end. Birds will continue to use them as shelter from weather and for protection from predators.
